			OPTIMAL TIME	PERIOD ALLOWED Results given with reservations (or sample date unknown)	DEADLINE EXCEEDED Sample refusal	
<b>NEONATAL ENTERITIS</b>	<ul style="list-style-type: none"> <li>■ Faeces</li> <li>■ Intestinal loopligated</li> </ul>	ELISA: <ul style="list-style-type: none"> <li>* Rotavirus</li> <li>* Coronavirus</li> <li>* <i>E. coli</i> F5</li> <li>* Cryptosporidia</li> </ul>	≤ 72 h	72 h < D ≤ 7 days	> 7 days	Quantity > 5 g
		Bacteriology: <ul style="list-style-type: none"> <li>* <i>E. coli</i> count</li> <li>* <i>E. coli</i> F5, F17, F41, CS31A typing</li> </ul>	≤ 48 h	48 h < D ≤ 7 days	> 7 days	Quantity > 5 g
<b>LISTERIA</b>	<ul style="list-style-type: none"> <li>■ Organs</li> <li>■ Nervous tissues</li> <li>■ Swab and environmental samples</li> <li>■ Pathological fluids (LCR or milk)</li> <li>■ Abortion products (swabs or fetal organs)</li> <li>■ Faeces</li> </ul>	* Bacteriology (isolation, identification)	≤ 48 working hours	48 h < D ≤ 7 days	> 7 days	Quantity > 5 g
<b>SALMONELLA</b>	<ul style="list-style-type: none"> <li>■ Organs (all species)</li> <li>■ Feces (all mammals)</li> <li>■ Milk</li> <li>■ Abortion products (swabs or fetal organs)</li> </ul>	* Bacteriology (isolation, identification, serotyping)	≤ 48 h	48 h < D ≤ 7 days	> 7 days	Quantity : >10 g for fecal matter
	■ Dust		≤ 48 working hours	/	> 96 h	> 20 g

DOMAIN	SAMPLING	ANALYSIS TECHNIQUES				PARTICULARITIES AND TRANSPORT CONDITIONS
			OPTIMAL TIME	PERIOD ALLOWED Results given with reservations (or sample date unknown)	DEADLINE EXCEEDED Sample refusal	
<b>SALMONELLA IN THE ANIMAL PRODUCTION ENVIRONMENT</b>	■ Cloths	* Bacteriology (isolation, identification, serotyping)				> 20 g of sample
	■ Boot Swabs					> 20 g of sample
	■ Slurry, manure					> 50 g
	■ Box bottoms					> 5 units
	■ Drinking water					> 100 ml
<b>MYCOBACTERIA IN BIRDS</b>	■ Organs	* Ziehl-Neelsen staining	≤ 48 h	48 < D ≤ 7 days	> 7 days	

## **Recommendations:**

- **Sample storage:**
  - \* Unless otherwise stated in the table, the sample must be placed in a sterile vial and refrigerated.
- **Transport packaging:**
  - \* For all samples, triple waterproof packaging is recommended.
  - \* For abortion samples, use the packaging reserved for this purpose.
- **Cases of refusal:**
  - \* Any sample that is unsuitable, rotten or in insufficient quantity will be refused analysis.
  - \* Acceptance deadline exceeded.
  - \* Frozen sample (unless otherwise stated in the table).
- **Bacteriological examination** to be carried out preferably before antibiotic treatment (if treatment is in progress, it is preferable to wait 7 days after stopping the antibiotics before taking a sample).
